# Corrugated Transformer Tanks - Opportunity

## Opportunity

Manufacturing facility for corrugated transformer tanks.

## Value Proposition

**100% imported;** high value proportion (**10%** of raw materials).

## Market Overview

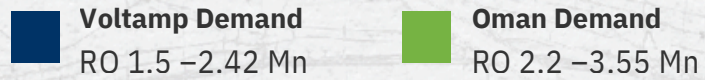

Energy demand is growing at pace with population expansion, industrialization, automation, and digitization. As global progress accelerates across these sectors, the need to upgrade electrical grids, expand power capacity, and invest in energy storage becomes increasingly critical—driving strong demand for transformers.

Across Oman and the GCC, there are currently no manufacturers producing corrugated-type fins, a key component in transformer tanks. Only 5–7 out of 32 transformer companies in the GCC manufacture CRG tanks in-house, typically relying on imported fins from outside the region. Notably, one manufacturer has announced plans to establish a corrugated tank facility in Jebel Ali Free Zone, UAE.

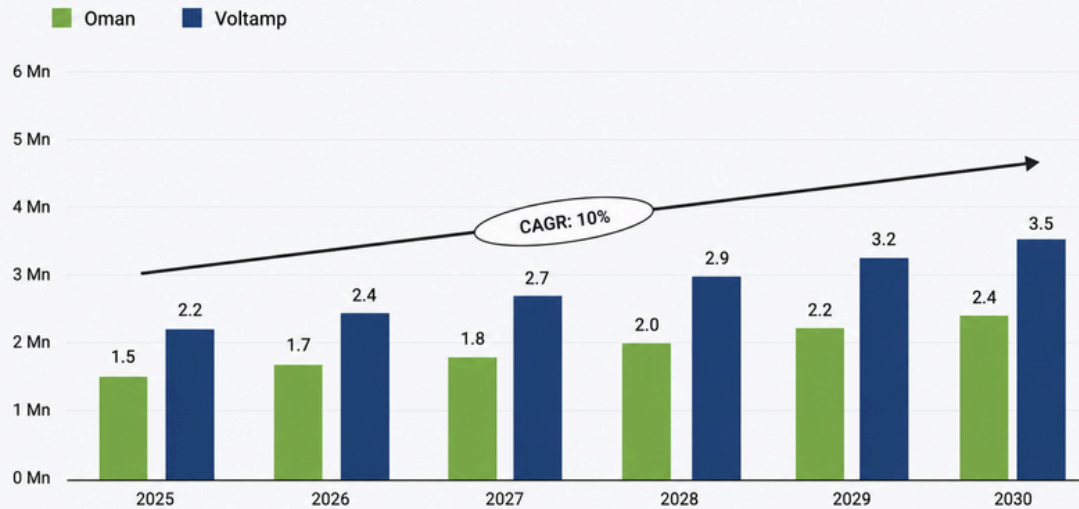

Globally, the transformer market is valued at approximately \$64 billion in 2025 and is projected to reach \$88 billion by 2030. Rising energy demand, coupled with the urgent need to upgrade and expand transmission infrastructure, will continue to drive this growth
